

Nelson Aero Club

March Newsletter

NEWS

February saw a number of students trying their hands at flying the bigger, faster, and roomier C172 - ETU, while our beloved C152, FLF, has unfortunately been out for an extended time in maintenance. FLF's rudder is presently being repaired after some rust was discovered during its scheduled check. Thank you everyone for your patience and flexibility while we wait for her return to service!

Theory Classes

The Meteorology classes have proven very popular with around 14 attendees most evenings. Thanks to Penny for sharing her valuable experience and knowledge with us! Law will be our next course so get in contact if you want to sign up.

Milestones

Caleb recently completed his first solo flight. Well done Caleb!

UPDATES

Club Security

Due to issues with unauthorised access, the club has tightened up security.

We would like to remind members that access codes to the building (and airside) must not be shared with non pilots. We would also like to touch on the instructor room. This is for club instructors only. If you solo hire an aircraft, text the duty instructor the day before and we will leave the keys and required headsets out for you. Club equipment can only be borrowed when operating club aircraft

Club Phone Number

The club now has a phone which instructors will be using to contact students instead of their personal ones. This will be left onsite when we go home to avoid being contacted in our down time. The phone number is 0277FLYNAC

Photos

Thank you for the photo submissions

If you have any, send them to instructors@nelsonaeroclub.co.nz for the chance to be featured on our social media.
